TMC SPECIFICATION NO. S-352

TITLE: CHANGES MADE IN GPT-750 TO ACCOMODATE BATTERY

JOB

APPROVED

[Signature] A. S. J.

SUPPLY A-1504

1. Shifted three air holes on main chassis (MS-1058).
2. Four "F" holes added to main chassis (MS-1058).
3. Enlarge hole "D" on main chassis (MS-1058) to accomodate grommet EY-102-3.
4. Added two wires to Interconnect Cable (CA-265-E) from P501 to Item 5 (below). CA-265-E now becomes CA-265-F.
5. Added four terminal barrier strip, ground lug, and two bypass capacitors to Power Chassis Assembly (A-1198-E), and connector two wires of Item 4 (above). A-1198-E now becoves A-1198-F.
6. Added Jack MS-3102 A-16S-1S (J5) to cover assembly A-1435 which becomes MS-1200.
7. Added 6 wires to interconnect Cable (CA-340).

ACCESSORY EQUIPMENT

1. Created battery supply unit (A-1504).
2. Install battery supply unit (A-1504) on A-1279.
