DATE 6-27-58 SH. 1 OF 1		TMC	SPECIFICATION	NO.	S 382
COMPILED BY A. J. J.	TITLE:	MODIFICAT	TION KIT FOR RSC		JOB/REV. A
APPROVED		PART OF KI	T-140		

### SUBJECT:

RSC feedback stabilizing lamps I<sub>1</sub>, I<sub>2</sub>, I<sub>3</sub>.

## EXPLANATION:

In the initial design of the RSC feedback circuit, these lamps were all carefully selected. It was found, however, that the lamps changed their characteristics in the field to the point where the feedback could no longer be properly adjusted. Also, it became desirable to buy lamps from any manufacturer and still have them operate properly. For these reasons, R1, R13, R25, R52, R54 and R56 were changed to permit a wider adjustment latitude.

# REQUIRED:

- 3 each RA103AQXM402A
- 3 each RC20GF221K

#### CHANGE:

Replace existing R1, R13, R25 to RA103AQXM402A Replace existing R52, R54, R56 to RC20GF221K
