MODULAR POWER SUPPLIES

- Solid State.
- 2 to 32 MHz.
- Single or Dual I.F.
- Size: 1¾ x 19 x 15 inches.
- Operates on 10 watts of Power.
- Provides Audio to 600 ohm Line.

... IS A COMPLETELY SOLID STATE COMPACT RECEIVER DESIGNED AND CONSTRUCTED TO OFFER ALL THE ADVANTAGES AVAILABLE TO THE STATE-OF-THE-ART FOR RECEIVING EQUIPMENT IN THE STANDARD AM OR SSB MODES. ITS LOW MASS AND MINIMAL HEAT CHARACTERISTICS MAKES THE STR-5 IDEAL FOR HIGH DENSITY MOUNTING.

Elimination of all receiver noise in the AM mode, except when the circuit is active with a suitable signal, is possible in the STR receivers by the addition of a CODAN unit. Many configurations are available. Model numbers are broken down as follows:

Model Number	Mode Requirements
STR-5U/L	USB, LSB, CW and AME.
STR-5U	USB, CW and AME.
STR-5L	LSB, CW and AME.
STR-5A	AM only.
STR-5AU	USB, AM and CW.
STR-5AL	LSB, AM and CW.

Any model can be converted to another model by changing the appropriate plug-in cards.

- Wide variety of power input configurations
- Selection of modular configurations for your operational requirements
- Availability of optional accessories to meet unique requirements
